

Action-Packed Resident Evil Hits Ship 1.5 Million Units Worldwide

Capcom has confirmed that this year's re-releases of the *Resident Evil* series' hits (*Resident Evil 4*, *Resident Evil 5* and *Resident Evil 6*) for PlayStation 4 and Xbox One have collectively shipped more than 1.5 million units worldwide. In North America, where the games have been released at both retail and digitally, the games have passed more than 1 million units in total. *Resident Evil* is Capcom's highest selling series with more than 69 million total units sold to date.

Each of the re-release games is available now at retail and digitally in North America with all DLC included for MSRP \$19.99. The games have also been available as digital releases in Europe for MSRP €19.99 / £15.99, and retail versions will be coming in December.

Capcom would like to thank all the fans that have celebrated the series' 20th anniversary by playing these releases. We hope you all look forward to a new era of survival horror in the terrifyingly intense *Resident Evil 7 biohazard* when it hits on January 24, 2017 for PlayStation 4 (with the included optional PlayStation VR Mode), Xbox One and Windows PC (Steam and Windows 10 Store).

Thanks,
Capcom PR and the *Resident Evil* team
